

Stop Most Small-Business Fraud

Five free habits. Start this week.

1

Confirm any money move by phone.

New bank details or a wire request? Call a number you already trust, not the one in the message.

2

Two people on every wire.

Above a set dollar amount, a second person approves before it goes out.

3

Two-step login on email and banking.

Your email is the master key. This is the highest-value hour you'll spend all year.

4

Check email forwarding rules monthly.

A rule you didn't create means someone is already inside.

5

Let your team slow down.

Urgency is the scam. A real boss and a real vendor can wait ten minutes.

If you're hit: report it the same day.

IC3.gov and your bank's fraud line. Speed is what gets money back.
